Database: SQL

PROJECTS

Personal Portfolio Website

This project is about developing a responsive personal portfolio website using HTML and CSS. The site includes sections for Home, Skills, Education, Projects, and Contact, showcasing my web development skills and professional background.

Face Recognition Based Attendance Management System

This project introduces a Face Recognition-Based Attendance Management System, Streamlining manual attendance with Haar-Cascade and Local Binary Pattern Histogram algorithms. the system automates accurate face detection and recognition, emailing attendance data to faculty members. capitalizing on the popularity of face recognition, it minimizes manual efforts and reduces proxy attendance

To-Do List App

This project is about developing a simple and efficient To-Do List application using HTML, CSS, and JavaScript. The application allows users to add, mark, and delete tasks, helping them manage their daily activities more effectively. It features a clean and intuitive user interface, ensuring a seamless user experience.
